COLORED

LIDS ENHANCE YOUR BRAND
AND STAND OUT ON SHELF

SUSTAINABILITY THAT WORKS FOR YOU

Lacerta has been committed to recycling since day one. It is the core of who we are today and where we're headed in the future. Our latest chapter in the time honored sustainability promise is ReCerta™, a post consumer recycled (PCR) plastic for all our PET-based food packaging. Today, Lacerta uses an average of at least 10% ReCerta™ PCR content, with custom blends available upon request.

LIFE CYCLE ASSESSMENT Achieve your carbon footprint reduction goals using Lacerta's life cycle assessment (LCA) tool. By using this powerful data, you can quantify the impact of your packaging decisions

HIGH PRESSURE PROCESSING (HPP) READY

- High Pressure Processing (HPP) is a food pasteurization process where food is subjected to elevated pressures (up to 87,000 lbs./Sq. In.) at ambient or chilled temperatures.
- HPP inactivates harmful microorganisms, facilitates food safety, and extends the shelf life of food (up to 120 days) while retraining food quality and natural freshness.
- Most Lacerta containers work in HPP applications. For very challenging application, Lacerta has containers made specifically for HPP. Ask your Lacerta representative for details.

T886 lid is designed to evacuate water used in HPP process
